

# The World Is Flat?

This is what happens when you play the strategy games.

## *His and Hers*

If you play by HIS rules the game ends in a draw. The last HIS piece and the Problem will chase each other around the board, infinitely.

If you play by HER rules then she will wipe HIM out and SHE will be left alone with the Problem.

## *Yours and Mine*

Both players will win if they play by OUR rules.

## *It's Still A Boy's Club*

The Boy's Club pieces are more numerous but if the Girl's Club pieces get an early advantage the Girl's Club can win.

## *My Best Move Is Your Best Move*

This game is very difficult if there is no cooperation between the players. It is possible to win if the players cooperate but it still takes an effort. Both players will either win or lose.
